The Senate

National Assembly, Abuja, Nigeria

Dear Sir/Ma,

**DEMAND FOR NEEDS ASSESSMENT AND CONSTITUENTS' ENGAGEMENT FOR THE SELECTION OF 2024 CONSTITUENCY PROJECTS**

1. I \_\_\_\_\_ hereby as one of your constituents humbly demand the need for your office to conduct a needs assessment, data collection and constituents' engagement for the selection of 2024 constituency project (s). As our representative, on behalf of the thousands of us, your constituents, we have no doubt in your undeniable capacity, knowledge and networks to turn the lives of our people around through legislative instruments, privileges and opportunities.
2. I am aware that the constituency project is one of the opportunities that you have to deliver good governance to us. Engaging me and thousands of people from our constituency, including youth, women and persons with disabilities (PWDs), would help to strengthen and shape the nominations of projects that will meet our collective needs and reposition our communities for economic productivity.
3. This request is in tandem with fiscal transparency and citizen participation in the budget process as provided and mandated in Nigeria's third National Action Plan (NAP III) for Open Government Partnership (OGP). In summary, this request is in support of the realisation of the NAP III and to drive Sustainable Development Goals (SDGs) through budgeting for citizens' critical needs in our national and subnational.
4. As our lawmaker, acceding to this request will place you on the path of addressing your people's critical needs especially as the impact of fuel subsidy removal bite harder in our communities. This singular act of yours will contribute to fixing our rural roads, decaying primary healthcare centres (PHCs), and primary and secondary schools as well as giving our teeming youths true empowerment that will make them productive and change their lives completely. All of these cannot be addressed if our annual constituency projects are being selected using your discretion or those of the people around you. It must be data-oriented for it to make a meaningful impact.
5. Dear Distinguished Senator, I look forward to the announcement of setting up your community engagement and needs assessment, and the eventual engagement with us, your constituents.
6. Thank you with kind regards.

Yours faithfully,
